- **Tools:** Git, Github, VirtualBox, Postman, Heroku, SSRS, Jest Testing Framework, Dockers/Kubernetes
- In-depth knowledge of end-to-end web services and full stack web development

RELEVANT WORK EXPERIENCE

Installed Building Products (IBP) - Columbus OH, U.S.A.

Application Developer

May 2018 - Present

Technologies & Tools: HTML, CSS, JavaScript, Classic ASP, ASP.NET, C#, VBScript, SQL, SQL Server, SSRS

- Performed quality assurance on reports converted from SAP's Crystal Reports to SQL Server Reporting Services (SSRS) and on the successful implementation of these reports on IBP's proprietary web-based costing application, helping to smooth the transition away from the company's legacy reporting services.
- Designed, developed, and implemented an update to a portion of the current user interface (UI) of IBP's proprietary web-based costing application to generate SSRS reports, both individually and for a selected batch of items, greatly improving the workflow for application users.
- Worked with non-technical business unit stakeholders and department teammates to plan and execute a project that would add on a user interface (UI) to IBP's proprietary web-based costing application and overhaul and automate a company-wide accounting claim system, significantly increasing throughput of invoice change requests.
